Unibody Machined TC4 Titanium Alloy

Featuring its high strength, low density and strong resistance against corrosion and high temperature, titanium alloy is ensured with a premium quality and an excellent performance to be widely used as aerospace components.

The detail-oriented machining with strict precision to 0.001mm offers a comfortable grip of the finely sandblasted silver-gray body.

■ Anti-corrosion ■ Ultra Lightweight ■ Premium Quality

Ultra Tough Hanging Tool

Inspired from the design of carabiners widely used as an essential component in rope-intensive activities such as rock climbing or bungee jumping, the NSH10 is a reliable tool for fixing or hanging external objects.
